

URGENT

The FAA will be making a second round of 6-7-8 Tower selections on Thursday 7/21/05 in Kansas City from the same list used for the last round of selections. You may add or subtract from your preference list through the Central Terminal Service Area HR office but it must be done by Wednesday afternoon to be considered on Thursday. The phone number and contact is on your original bid. These selections are primarily to fill declined positions but due to changes in the situation at some towers and new priorities being set; positions previously not filled may be considered for selection. I am sending this out because I am not sure that you are aware that you have had the opportunity to make these changes at any time and to inform that further selections will be made Thursday.
